WORK EXPERIENCE

Enventico B.V.
Junior frontend developer

September 2024 - October 2022

- I participated in building a very large project in React typescript for the Belgian company "Nedschroef Machinery", which is still developing.
- Working with reusable components: I developed and optimized React components, which contributed to simplifying the code, making it easier to scale and maintain.
- API integration: I implemented API calls, retrieved data and managed its state using Context API, which allowed for dynamic updating of content on the page.
- API integration was based on using react useQuery and mutations.
- Performance optimization: I analyzed and improved the application's performance, using techniques such as lazy loading or component rendering optimization.
- Application testing: I wrote end-to-end tests using tools such as React cypress.
- Team collaboration: I worked with a team of developers, using Git for version control and tools such as Jira for task management.
- I used css, styled components, designed system.
- The work was also based on data modeling.

Ceva Logistic Born
Marshalling goods and loading

May 2020 - December 2018
